## General

What is the driveway made of and what is its width? .....

Are there overhanging trees or wires? .....

What are the foundations on the house? CONCRETE / TIMBER & PILES .....

Is the house plumbed with copper or PVC piping? .....

## Questions Specific to Pop Up & Mini Bathrooms (in garages)

The Pop Up unit is ideally suited to those garages that have a laundry attached but this is not essential. *Please take photos.*

What is the width of the garage door & height with door open? .....

Is the garage floor flat & what material is it made from? (A sketch of the dimensions of the garage would be useful.) .....

How high is the floor to the ceiling in the garage? .....

Is there anything hanging off the ceiling? .....

What type of door is it? Roller door or tiltadoor? .....

Where is the nearest hot and cold water supply? .....

What other entries are there to the garage? .....

Where is the nearest gully trap in relationship to the garage? .....

What electrical outlets are available inside the garage? .....

*Feel free to contact us to arrange a Zoom virtual site meeting with you and one of our team. If you think the site may be more complicated, we can organise a site visit with one of our team members in person.*

## Questions Specific to Outside Bathrooms

Is this a permanent or temporary solution? If temporary, there needs to be an action plan with an intended end date. *(This will negate the need for Council consent.)* .....

Is there room to bring the Unit onto property on a tandem trailer? .....

Where will the Unit be placed on the property? .....

Will it be stand alone or will be connected to a ramp or platform to the main dwelling? .....

How high (approx.) will the floor of Unit be off the ground? .....

Where is the nearest gully trap in relationship to the Unit? .....

Where is the nearest cold water source? .....

Is the house on town supply or is water supplied to the house by way of a pump? .....

The Unit will need a caravan type power plug on the outside of the main dwelling. This can be made back-to-back with an inside power point on an outside wall within 10 metres of where the Unit will be placed - is there one? .....
