

AUTOMATION

AUTOMATIC SWING DOOR OPENER

- Can be opened with remote, push button, keypad or sensor.
- Remote control distance of over 10m
- Can hold up to 200kgs of weight, making it more powerful to run.
- Optimised motor design with higher efficiency for better energy savings.
- Made from reinforced aluminium parts for strength, anti-wear, anti-pressure, firmness and durability.
- Can be retrofitted to existing door as well

AUTOMATIC SLIDING DOOR OPENER

- Features an iLock system that locks the door automatically when closed
- Becomes deactivated in the event of a power-cut so the door can be used manually
- Comes with a back-up battery for 500 cycles of power if it loses power
- Closes on its own once opened
- Sensor fitted to stop door closing on person entering or exiting
